TRAFFIC ENGINEERING & CONTROL
INDEX TO VOLUME 20
January 1979 – December 1979

(1) 12.566 Accessibility measures and their suitability for use in trip generation models: *G. R. Leake and A. S. Huzayyin*
(2) 7.361 Adaptive control at an isolated intersection—a comparative study of some algorithms: *L. de la Breteque and R. Jezequel*
(3) 1.9 Algorithm for real-time control of critical intersections, An: *P. G. Michalopoulos and G. Stephanopoulos*
(4) 8/9.419 Analysis of the headway distribution of an urban bus service, An: *A. Polus*

(5) 12.590 Calculation of fuel consumption due to traffic congestion in a case-study metropolitan area: *R. L. Tobin*
(5) 6.296 Capacity-restrained road assignment—I. The convergence of stochastic methods; II. Equilibrium methods; and III. Improved equilibrium methods: *D. Van Vliet and P. D. C. Dow*
(7) 8/9.410 Car availability and transport need—an approach to the development of an appropriate indicator for transport planning: *M. Benwell and I. White*
(8) 6.306 Comparison of bus operations in cities of developed and developing countries, A: *G. D. Jacobs, D. A. C. Maunder and P. R. Fouracre*
(9) 2.59 Comprehensive Traffic Management in York—by design and default: *R. H. King*
(10) 11.510 Comprehensive Traffic Management in York—the monitoring and modelling: *J. A. L. Dawson*
(11) 7.341 Computer aids to large-scale traffic signal maintenance: *J. H. Blase*
Conference reports: See (30)(41)(57)(58)(63)(68)
(12) 10.460 Control and routeing of traffic in a road network: *J. A. Charlesworth*
(13) 11.519 Convergent probabilistic road assignment model, A: *J. Randle*

(14) 12.596 Delays at priority intersections under non-stationary traffic flow conditions: *H.-G. Retzko and F. Tonke*
(15) 2.67 Determining the range of optimal trade-offs between environmental quality and accessibility on large networks: *C. Robinson, C. Le Fevre, H. E. Williams and F. E. Joyce*
(16) 4.167 Determining transit vehicle requirements on local city bus routes:—a different approach: *J. L. Edwards*

(17) 1.16 Effects of gap acceptance criteria on merging delay and capacity at an uncontrolled junction, The: *D. E. Blumenfield and G. H. Weiss*
(18) 6.315 Electronic Gas Watchdog, The (a unit suitable for detecting the presence of gas in a signal controller): *P. Welsh and K. Fox*
(19) 2.62 Estimates of fuel savings through improved traffic flow in seven U. S. cities: *M.-F. Chang and A. J. Horowitz*
(20) 11.539 Estimation of turning flows on a junction, The: *H. J. van Zuylen*
(21) 2.88 Evaluation of road traffic noise annoyance experienced by residents, The: *N. Silvani*

(22) 8/9.406 Factors influencing the planning and design of bus terminals: *J. K. Steer*
(23) 11.533 Fuel price and fuel demand for transport—some considerations: *M. T. White and G. D. Audus*

(24) 6.320 Importance of lane-changing on motorways, The: *U. Sparmann*
(25) 7.353 Improved network control by using Transyt: *W. F. Timmermans, P. P. J. van den Bosch and J. J. Klijnhout*

(26) 4.159 Labour-saving methods for counting traffic movements at three- and four-arm junctions: *M. L. Marshall*
(27) 3.102 Large bridge and tunnel crossings—a second look at the Bosphorus and Hong Kong: *M. R. J. Ford, R. Paling and G. Rogers*
(28) 3.118 Leeds, Transport research at the University of—Report for 1978: *H. R. Kirby*

(29) 4.156 Microprocessor-based system for traffic data collection, A: *P. A. Storr, J. Wennell, M. R. C. McDowell and D. F. Cooper*
(30) 7.364 Mobility in rural areas (conference report): *P. R. Oxley and R. A. F. Seaton*
(31) 8/9.399 Multi-variable models of car ownership: *M. J. Hutchinson*

National Bus Company 'MAP' Market Analysis Project, The:
(32) 10.471 1. General outline: *B. Barrett and M. Buchanan*
(33) 11.541 2. Collecting and presenting the demand information: *T. Brookes and D. Kilsby*
(34) 12.575 3. System design: *N. Bursey, D. McCallum, I. Macbriar and K. Mills*
(35) 4.221 Newcastle upon Tyne, University of (Transport Operations Research Group)—Progress Report 1978: *P. J. Hills*
(36) 12.587 Non-iterative methods for generating a realistic turning flow matrix for a junction: *M. Norman, N. Hoffmann and F. Harding*

(37) 10.486 On estimating turning flows at road junctions: *A. Mekky*

(38) 5.257 Parking at a hypermarket—six years on: *R. W. Kelly*
(39) 8/9.429 Partial matrices, empirical deterrence functions and ill-defined results: *M. J. L. Day and A. F. Hawkins*
(40) 8/9.422 Partial matrix techniques: *H. R. Kirby*
(41) 3.127 Pedestrian conference (report): *J. Jarvis*
(42) 6.316 Photologging for highway and traffic surveys: *K. Arkley and J. J. Malloy*
(43) 12.594 Portable event recorder, A: *P. B. Green and M. MacMillan*
(44) 2.52 Potential of feeder bus systems serving commuter rail stations, The: *G. R. Leake and M. Read*
(45) 10.479 Prediction of noise levels from unrestricted traffic in urban situations by means of a digital computer simulation, The: *R. R. K. Jones, D. C. Hothersall and R. J. Salter*
(46) 3.107 Probabilistic approach to incident detection on urban freeways, A: *M. Levin and G. M. Krause*
(47) 11.548 Problems with the Park System of parking control, A note on: *D. Ó. Cinneide*
(48) 4.163 Program to model flows, queues and delays at a roundabout, A: *E. M. Hollis*

(49) 8/9.403 Question of parking, A (survey, analysis and forecasting techniques used in a study of off-street parking): *H. Pearce and P. Jackson*

(50) 4.172 Road traffic simulator employing microprocessors, A: *M. G. Hartley and G. Bevilacqua*

(51) 10.467 Site evaluation of a Zebra crossing simulation model: *C. Cresswell and J. G. Hunt*
(52) 8/9.390 Some factors affecting the capacity of signalised intersections: *D. Branston*
(53) 10.482 Speed/flow/concentration, A further look at: *N. C. Duncan*
(54) 10.484 Survey of ferry passengers, A: *R. L. Pretty*

(55) 4.220 Tanner's formula for the capacity of a minor road at an uncontrolled intersection, A new look at: *M. J. Brennan and M. P. Fitzgerald*
(56) 4.i Traffex 79 Traffic Engineering and Road Safety Conference and Exhibition Guide and Catalogue
(57) 11.549 Traffic control systems (conference report): *M. J. Smith*

(58) 3.129 Traffic data collection (conference report): *L. J. Mountain*
(59) 11.546 Traffic effects of introducing flexible working hours in a large office block, The: *M. J. Foyster and J. A. Durrant*
(60) 1.2 Traffic implications of hypermarket development, The: *M. R. Harris and H. R. Andrew*
(61) 11.516 Trafficq—a comprehensive model for traffic management schemes: *D. M. W. Logie*
(62) 11.522 Transit priorities and development of a passive bus detection system in Edmonton: *L. Cheng, J. Schnablegger and S. Teply*
(63) 5.267 Transport and the Inner City (conference report): *R. L. Mackett and A, D, May*
(64) 2 Transportation System Management—TSM-type projects in six selected European countries: *A. D. May and D. Westland (loose supplement)*
(65) 2.77 Transport Studies Group, University College London—Progress Report 1978: *R. E. Allsop*
(66) 7.348 Trip assignment techniques current in the U. K.: *F. K. Lai and D. Van Vliet*

(67) 2.91 University courses in transport, 1979–80
University Progress Reports: See (28)(35)(65)
(68) 4.226 Universities Transport Study Group (conference report): *N. B. Hounsell*

(69) 5.254 Vehicle speeds on the M1 motorway in Nottinghamshire—1974–78: *L. W. Ackroyd and M. Bettison*

(70) 5.246 Weighting transport objectives using the method of pair comparisons: *G. R. Leake and M. Dix*
West Yorkshire Transportation Studies:
(71) 1.27 2. Accessibility analysis: *J. S. L. Cooper, P. N. Daly and P. G. Headicar*
(72) 2.82 3. Analysis of environmental issues: *P. G. Headicar*
(73) 3.111 4. Application of the approach and techniques to Leeds: *R. D. Coombe*
(74) 4.213 5. Application of the approach to the Freestanding Towns: *B. J. W. Large, J. C. Rawson and I. S. Haigh*
(75) 5.268 6. Development of the Country Plan: *G. F. Self, R. D. Coombe and I. Blair*
